

Customizing your Stern NBA pinball machine with Mcfarlane action figure toys.

Tools and supplies required

- Phillips screwdriver
 - 1/4" Nut driver
 - 5/16" Nut driver
 - Pliers
 - Diagonal cutter
 - JB Weld
 - Crazy glue
- Hex spacers (assorted sizes, male to female or female to female # 6-32 threads) depending on location. (Note) See pink page P10 in the game manual for specs and part #'s.

- 1) Find the proper location on the playfield for the action figures you have selected. (Note) Make sure the action figure will physically fit in the location you have selected and will not create a ball trap.
- 2) Remove the existing phillips head screw or 5/16" lock nut from the plastic in which you want to mount the action figure from..
- 3) Install the proper hex spacer for your application in place of the phillips head screw or 5/16" lock nut removed in step # 2.
- 4) Cut and bend the metal mounting rod which supports the action figure if necessary for proper height and angle.
- 5) Carefully apply JB Weld into the female end of the hex spacer and install the metal mounting rod. (Note) Avoid getting the JB Weld on the plastic or playfield and allow to dry according to the directions on the package.
- 6) Use Crazy glue to secure the ball to the action figure's hand. This will prevent the ball from falling off and creating a ball trap.
- 7) Mount the action figure toy onto the metal mounting rod.

Please call Stern Pinball INC. at (800) 542-5377 if you have any questions regarding the mounting of the action figurine toys.
